🐙 github.com/Aasim-Qureshi

Full Stack Developer with expertise in React, React Native, Node.js, and PostgreSQL, dedicated to building scalable, high-performance applications. Focused on seamless user experiences, backend efficiency, and robust data management. Passionate about leveraging modern technologies to develop innovative solutions, with a commitment to continuous learning.

Skills

Programming Languages

- JavaScript
- TypeScript
- HTML
- CSS
- Python

Frameworks

- React js
- React Native
- Node js
- Express js
- PostgreSQL
- Next js

Others

- Linux
- AWS
- Git/Github
- Markdown

Projects

Huddle

Description: A dynamic video chat app that brings people together through real-time audio, video, and collaborative drawing. Huddle is designed to enhance communication and creativity, making it easy to connect face-to-face and share ideas visually with others in a fun, interactive space.

My Role

- **Backend Development:** Built core functionalities for smooth data and API handling.
- **Frontend Development:** Developed user interfaces to enhance usability.
- **Integration:** Aligned backend and frontend for seamless functionality.

Technical Achievements

WebRTC: Enabled real-time video/audio streaming with low latency.

Socket.IO: Powered live collaborative drawing and syncing.

StoreStuff

Description: It is a secure, cloud-based storage solution that empowers teams to organize, share, and access files instantly. Its intuitive file-system and one-click downloads streamline collaboration—making data safe, accessible, and always within reach.

Achievements

- **Collaboration:** Enables teams to safely store, organize, and share files through the cloud.
- **Effortless Accessibility:** Enhances experience by making file retrieval fast, intuitive, and reliable.

Technical Achievements

File Hierarchy: Implemented a fully functioning folder and file-system.

Concurrency: Implemented invites allowing multiple users to access the same space.

Projects

The Money Dashboard

Description: A React Native based FinTech application that allows users to manage their finances, keep an eye on the stock market and follow financial trends for crypto currencies. It does so while also implementing beautiful animations and detailed graphs.

Achievements

- **Financial Management:** It gives users an easy way to see and manage their finances
- **Market Trends:** It allows users to keep an eye out for trends in the stock and crypto market.

Technical Achievements

UI/UX Design: Using design principles and animations to create a more appealing application.

APIs and Graphs: A well integrated finance API with data represented creatively using graphs

AWS EC2 Website Deployment

Description: Hosted a simple website on AWS EC2, leveraging cloud infrastructure for reliable and accessible deployment. Configured the environment and server to ensure smooth functionality and uptime.

Technical Achievements

Hosting: Deployed a simple website on AWS EC2 for reliable access.

Setup: Configured EC2 and environment for seamless hosting.

Education & Certification

Caset College of Computer Science

(2022 - 2025)

- **Bachelors in Computer Application (BCA):** Gaining a comprehensive understanding of computer science fundamentals and practical skills in software development.
- GPA: 8.5

Certificate of Appreciation from Caset College of Computer Science

- Constructed a Linux-based Samba server which is still in use in the college.
- Upgraded all computer systems from proprietary operating systems and software to their Open-Source alternatives improving workflow efficiency, reducing costs and aiding students making their skill-set more diverse
